

JetLocal Plus

Simple Transparent Growth

Expand Mobile Lead Generation

We build and manage for you our JetLocal Plus Google My Business optimisation service that reaches out to Maps, web, directory Listing and Facebook business using JetLocal Plus to tailor the features for your business. Once operational you can use JetLocal Plus to generate reviews as social proof and see results in real time.

JetLocal Plus provides you a mobile access to market your business services and find new leads across the major platforms with real time analytics to manage the results from the business communities you want to serve.

Seek Reviews - Generate Leads across multi platforms

JetLocal Plus - Google My Business Optimisation

Expanding your GMB with JetLocal Plus adds the relevant content and images to your map listing and business profile, adds defined keywords, geolocations, category and additional attributes.

JetLocal Plus provides key enhancements and a transparent way to manage and use search, map and social platforms of Google, Facebook, Listing and website from one single spot. Measure in real time the results of your decisions for feedback on what works.

Integrate Google, Facebook and Website

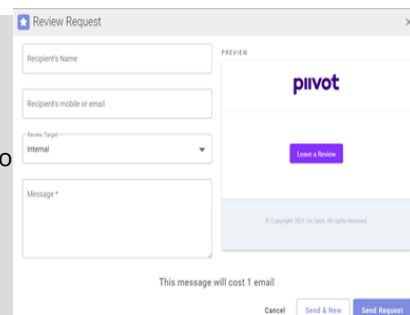

Build on your Google My Business profile and GMB map listing using JetLocal Plus to add, with a few clicks, a directory Listing, Facebook page or website content with posts, pictures and reviews. Use JetLocal Plus dashboard to see all results together. Use to upload profile changes or new content on Google Maps, Facebook, Listing and any attached dynamic website.

Manage Contacts and Review Requests

Build trust and improve your business reputation online by uploading your contacts and schedule requests. Manage existing customer reviews on Maps via JetLocal Plus and respond quickly to customer comments and turn concerns to interest and leads.

Use JetLocal Plus to update your business information so it is the same on each attached platform to improve search trust.

Leads - See what works

JetLocal Plus peels back the layers of what is working or not for you in a single chart with optional keywords in your hand. It does away with the expensive and opaque out of date reports that provide little real guidance as to what marketing messages are working for your business. Keep business profile hours, address, galleries, posts and available services up to date and in-sync on Google, Facebook with auto sync to your website and Listing.

Using JetLocal Piivot Dashboard

Want to be more involved. We send you a login to the JetLocal Plus dashboard so you can use your phone to take a snapshot of a job, upload it to JetLocal Plus then post to all the connected media. Build lead conversion flow with posts and answers to review questions. Reputation in control real time. See directly the results of posts, reviews, listings and chosen keywords and ads real time with integrated single point stats and reports from all the attached platforms.

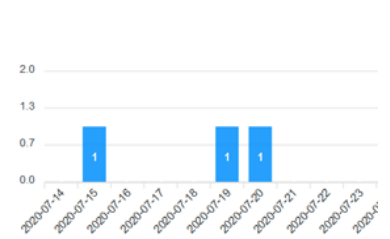

JetLocal Plus is the simple gateway to effective business advertising.

New Lead Generation

In addition to the GMB and Facebook is web lead generation from forms, keywords, click to call and messaging. JetLocal Plus links approved websites that use a lead generation form to deliver leads directly to you from new customers. A click to call feature may be included back to your mobile phone.

You can send SMS and email requests to customers and Facebook messenger may be added if platform is attached.

LEADS GENERATED

Update JetLocal on-demand

With JetLocal Plus you have the flexibility to pause campaigns or change your info at any time after the initial term. We assist you to efficiently update your JetLocal Plus profile which then optionally updates the attached GMB, Listing, dynamic website and Facebook profile information. You may at any time check reviews, post images, push new content, contact info, website and hours at whenever time you wish.

Performance Reports

See both summary and advanced stats on your phone showing a consolidation on how your marketing is performing online, with easy-to-understand profile views and leads generated that are available as collected.

Reporting may go across reputation, map listing, social media, website traffic, advertising and SEO.
