

# Jetsite Website JetLocal GMB

A dynamic, automatically updating full website solution for Small business

## Manage. Grow revenue. Maps. Leads

We build you a fully connected fast dynamic 2 page landing page website and optimised Google My Business map listing with dashboard and content control that you can view or even update anytime from your phone using your dashboard. We link the website to the JetLocal GMB and optimise the Map entry so it may be used to auto update and refresh content and improve the leads that your website with Google Map may generate.

**Jetsite Website  
JetLocal GMB**

\$ 495 inc GST\*

Jetsite with JetLocal and dashboard integration unlocks leads & customer growth using only a mobile phone.

## Jetsite Website – The Sales doorway to Lead Success

### Included in Jetsite\* we build for you

### Expand Mobile Lead Generation

We build and manage for you a JetLocal Google My Business optimisation to improve your business reach on Google Maps. Use JetLocal to tailor features for your business. You can use JetLocal with dashboard to generate posts, reviews and leads.

JetLocal optimisation adds keywords and geo location, images and relevant content to improve your performance in your local area on Google Maps. Combining with a Jetsite website provides mobile access to market your business services and find new leads across the major platforms with real time analytics on demand to manage the results from the business communities you want to serve.

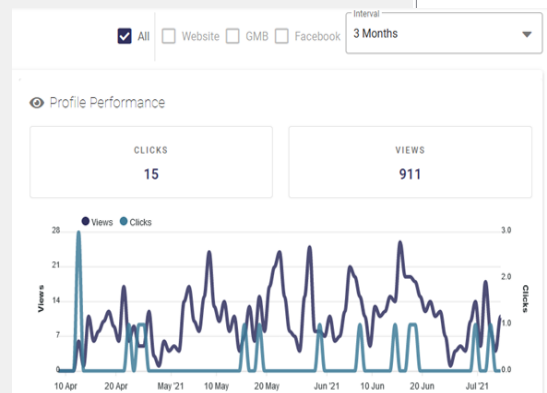

## Jetsite Platform

**Jetsite website on the free Piivot platform** enables your business to tailor a landing page website solution to suit your growing requirements with key business description and data, gallery section, testimonials, pricing tables, your products and services and much more. JetLocal adds social media setups for Maps, Facebook, Google or a managed Adwords campaign and more.

Dashboard access is available from smart devices, laptops and phones.

The business profile established is the single source of truth for business data integrated into content management for Google, Maps, Facebook and website. Update all attached platforms with option of update field selection. Add new Logo, Cover Image and preview. Real time stats and performance all on your mobile phone.

\*First year then \$299 inc gst / annum for renewal of Jetsite, maintenance and support.

- Continuous Platform Updates

## Why Need a Website?

A Jetsite dynamic landing page website when combined with a JetLocal Google My Business Map optimisation is a digital doorway to your business that works all hours for your success. Jetsite with GMB optimisation has local focus (geo located) and is a managed website that is linked to a Google Maps and local search. A website is the most reliable way to show potential customers what your business can do and is a window into your business's best solution, products and advantages. Add real time chat, reviews and posts with Google linking to allow potential customers to interact seamlessly.

If you do not have a website or one that delivers or you rely mainly on word of mouth or signs that reach less customers every year then a Jetsite is the solution and is the digital growth pathway for your business.

The change in customer feedback power means that your posts can be optionally auto published to your Jetsite website to improve relevant content that is now relied upon by almost all prospective new customers as they research a business before deciding on contacting.

95% of consumers use search to review your business before contacting
